

KARTHICK RAJA

DATA ANALYST

Chennai, TN | +91-6383268445 | karthiikarthii46@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with hands-on experience in SQL, Python, and Power BI, specializing in data extraction, transformation, and visualization. Proven ability to process large datasets (50K+ records), improve data accuracy (98%), and build dashboards for KPI tracking and business intelligence reporting. Skilled in ETL pipelines, exploratory data analysis (EDA), and transforming raw data into actionable insights for decision-making. Strong foundation in SQL querying, dashboard development, and data-driven decision-making

TECHNICAL SKILLS

Languages: SQL, Python

Visualization: Power BI, Excel

Libraries: Pandas, NumPy, Matplotlib, Seaborn

Tools: MySQL, Git, Streamlit

Data Analysis: ETL, EDA, Data Cleaning, KPI Reporting

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Besant Technologies, Chennai | Feb 2026

- Cleaned and validated 50K+ records using Python (Pandas), improving data accuracy to 98%
- Performed data extraction, transformation, and loading (ETL) on structured datasets
- Developed and optimized SQL queries (joins, aggregations, filtering) for reporting and analytics
- Designed and developed Power BI dashboards for data visualization, KPI tracking, and business intelligence reporting
- Conducted exploratory data analysis (EDA) to identify trends and generate actionable insights
- Automated data processing workflows, saving 8+ hours per reporting cycle
- Reduced ETL pipeline errors by 35% through validation and error-handling techniques

PROJECTS

API Performance Monitoring & Analytics System | Python · SQL · Power BI

- Designed and implemented an ETL pipeline for data extraction, transformation, and loading of 100K+ API log records
- Achieved 99.5% data consistency through validation and data quality checks
- Developed Power BI dashboards for data visualization and real-time performance monitoring
- Analyzed SLA, latency, and failure rates to support system optimization
- Improved incident detection and analysis speed by 30%

Stock Portfolio Analysis Dashboard | Excel · Advanced Formulas

- Processed and analyzed 10K+ rows using pivot tables and advanced Excel formulas
- Applied VLOOKUP and INDEX-MATCH for data consolidation and transformation
- Built interactive dashboards with charts and slicers for data visualization
- Reduced reporting time by 40% through automation
- Generated insights to support investment decision-making

AI Bird Species Recognition System | Python · Scikit-learn · Streamlit

- Developed a machine learning model using MFCC-based audio feature extraction
- Improved classification accuracy across multiple bird species
- Built a Streamlit application for real-time prediction
- Trained and evaluated model to improve prediction accuracy across bird species

EDUCATION

B.E. Computer Science and Engineering

Hindusthan Institute of Technology, Coimbatore | CGPA: 7.2

Apr 2026

CERTIFICATIONS

- Data Science & Machine Learning – Besant Technologies
