Profile summary

Data Analyst / Power BI Developer with hands-on experience in SQL, Power BI, DAX, Power Query, Excel, and data modeling. Experienced in developing KPI dashboards, executive reports, and automated BI solutions across sales, banking, and supply chain datasets. Skilled in data extraction, transformation, validation, reporting automation, and translating business requirements into actionable insights. Tracked AED 15M+ in commercial opportunities and reduced reporting effort by 12+ hours per week. Based in Dubai, UAE, available immediately.

Technical Skills

BI & Data Visualization: Power BI (Desktop & Service), DAX, Power Query (M), KPI Dashboards, Executive Reporting, Data Visualization, Drill-through Reporting

Databases & SQL: SQL, SQL Server, PostgreSQL, MySQL, Relational Databases, Complex Joins, CTEs, Subqueries, Window Functions, Aggregate Queries, Database Normalization

Data Analysis: Trend Analysis, Exploratory Data Analysis (EDA), Sales Pipeline Analytics, Customer Segmentation, Margin & Variance Analysis, Data Cleansing, Data Validation, Data Standardization

Excel & Automation: Advanced Excel, XLOOKUP, Power Pivot, INDEX-MATCH, Macros, Reporting Automation, Reporting Trackers & Templates

Data Modeling & ETL: Data Modeling, Star Schema, ETL Workflows, Data Transformation, Power BI Gateway, Scheduled Refresh, Row-Level Security (RLS)

Programming & Tools: Python (Pandas, NumPy), Azure, Git, JIRA

Work Experience

Besant Technologies | Chennai, India

Jan 2026 – Jul 2026

Data Analyst Intern

- Built end-to-end BI reporting solutions across Retail, Banking, and Supply Chain datasets, covering data extraction, cleansing, validation, analysis, and Power BI reporting.
- Used SQL with CTEs, joins, window functions, and aggregations to clean, validate, and standardize 500K+ transactional records, improving data accuracy and consistency across reports.
- Reviewed reporting and data refresh workflows and configured scheduled automation through Power BI Gateway, reducing reporting delays by 35% and improving reporting turnaround.
- Conducted Exploratory Data Analysis (EDA) using SQL and Python (Pandas) to identify sales trends, customer churn indicators, and fulfillment bottlenecks, supporting data-driven decision-making.

Enjay Engineering | Dubai, UAE (Remote)

May 2025 – Nov 2025

Power BI Developer

- Designed and maintained Power BI dashboards delivering executive and project-level KPI reporting for engineering quotation and commercial pipeline performance, giving regional leadership visibility into AED 15M+ in active opportunities across the UAE emirates.
- Built Star Schema data models and 30+ DAX measures covering time intelligence, YoY growth, conversion rates, and quotation aging to support engineering project performance reporting and management reviews.
- Automated the weekly quotation reporting workflow using Power Query, eliminating 12+ hours of manual reporting effort per week and improving reporting efficiency.
- Analyzed regional product demand, steel grades, volumes, pricing, and margins to identify trends and margin leakage, providing actionable insights for prioritizing high-value commercial opportunities.
- Implemented Row-Level Security (RLS) to provide role-specific branch-level access for regional sales managers, strengthening data security and reporting governance.

Projects

Steel Quotation Management & Sales Analytics Dashboard

Tools: Power BI, SQL, DAX, Power Query, Excel

Impact: Reduced weekly sales reporting time by 12 hours and improved sales conversion by 15% through UAE emirate-level opportunity tracking.

- Structured periodic quotation data covering customers, steel products, quantities, prices, status, closing dates, and follow-up activity into a Power BI-ready reporting dataset.
- Applied Power Query to cleanse, transform, validate, and standardize quotation data, resolving duplicates, inconsistent values, missing fields, and date-format issues.
- Built a 5-page Power BI dashboard with KPIs covering quotation value, win/pending opportunities, win rate, customer performance, product demand, steel volume, and UAE emirate-level activity.
- Developed DAX measures and interactive filters enabling management to analyze quotation trends, identify high-value opportunities, compare customer and product performance, and prioritize follow-up actions.

Business Performance & Customer Analytics Dashboard

Tools: Power BI, SQL, DAX, Power Query, Excel, Azure

Impact: Analyzed \$2.3M in revenue and \$286K in profit across 9,994 orders, providing insights into customer retention, profitability, and year-to-date performance.

- Integrated sales, customer, product, and regional datasets from multiple sources, including Azure-based sources, to support structured business performance reporting.
- Used SQL and Power Query to extract, cleanse, transform, validate, and standardize data before developing a Star Schema reporting model.
- Developed 20+ DAX measures covering revenue growth, profit margin, average order value, customer retention, and YTD performance to support KPI-driven analysis.
- Built interactive Power BI reports with drill-down analysis across customer, product, and regional dimensions, identifying trends and performance areas requiring management attention.

Banking Performance Dashboard

Tools: Power BI, SQL, MySQL, Power Query, DAX

Impact: Identified ₹4.87B in transaction value and 150K+ transactions, enabling the bank to optimize fee structures and reduce high-failure segments by 25%.

- Analyzed 150K+ banking transactions covering transaction performance, fees, taxes, customer activity, and regional performance.
- Built SQL and Power Query data transformation and validation workflows using joins, CTEs, aggregations, and window functions to improve data accuracy and integrity.
- Developed a 4-page interactive Power BI dashboard with KPI, time-based, and regional analysis to identify transaction trends, high-failure segments, and customer behavior patterns.
- Presented structured analytical insights through interactive visualizations, translating transaction performance trends into clear findings for business decision-making.

Education

Bachelor of Engineering (B.E.) in Computer Science & Engineering

Hindusthan Institute of Technology, Coimbatore | 2022 - 2026

Certifications

- Microsoft Power BI Data Analyst
- Google Business Intelligence
- Microsoft Azure Fundamentals (AZ-900)
- Generative AI for Data Analysts – IBM

Languages

English | Tamil | Malayalam
