

KARTHICK RAJA

DATA ANALYST

Chennai, TN | +91-6383268445 | karthiikarthii46@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst & Power BI Developer with hands-on experience designing end-to-end BI solutions — from Power Query data transformation and star-schema modeling to DAX measure development, interactive dashboard storytelling, and Power BI Service publishing. Proficient in SQL, Python, and Excel for ETL workflows and exploratory data analysis. Delivered analytics projects across Finance, Manufacturing, and Sales domains, processing 50K+ records with measurable improvements in reporting accuracy and decision-making speed. Seeking a Power BI / Data Analyst fresher role to contribute business intelligence solutions on a scale.

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Besant Technologies, Chennai | Feb 2026 – Present

- Cleaned, transformed, and validated 600K+ records using Python (Pandas) and Excel, improving data quality and reporting accuracy for business analysis.
- Performed end-to-end ETL processes including data extraction, transformation, loading, and validation on structured datasets.
- Developed optimized SQL queries using Joins, Aggregations, Subqueries, and Filtering techniques to support reporting and analytical requirements.
- Designed and deployed interactive Power BI dashboards featuring KPI cards, drill-through pages, slicers, bookmarks, and dynamic visualizations.
- Built DAX measures for KPI tracking, trend analysis, and business performance monitoring.
- Conducted exploratory data analysis (EDA) to identify patterns, anomalies, and performance improvement opportunities.
- Automated repetitive reporting and data-processing tasks using Python, reducing manual effort and improving operational efficiency.
- Applied data validation and error-handling techniques to ensure ETL reliability and reporting accuracy.
- Supported stakeholder reporting initiatives by delivering actionable insights and business intelligence solutions.

TECHNICAL SKILLS

Reporting & BI: Power BI, DAX, KPI Dashboards, Data Visualization, Dashboard Development, Power Query, Business Reporting
Data Modeling & ETL: Data Cleaning, Data Validation, ETL Pipelines, EDA, Trend Analysis, Data Transformation, Reporting Automation

SQL & Databases: SQL, MySQL, Joins, Aggregations, Subqueries, Filtering, Query Optimization

Python: Pandas, NumPy, Matplotlib, Seaborn, Data Processing, Automation

Excel: Pivot Tables, VLOOKUP, XLOOKUP, Conditional Formatting, Data Analysis, Reporting

Cloud & Tools: Microsoft Azure, Power BI Service, Blob Storage, Google Looker Studio, Git

Soft Skills: Analytical Thinking, Problem Solving, Stakeholder Communication, Business Analysis, Team Collaboration

PROJECTS

Banking Performance Dashboard | [Power BI](#) | [SQL](#) | [DAX](#) | [Excel](#)

- Designed and developed a multi-page Banking Performance Dashboard to analyze 150K+ banking transactions with a total transaction value of ₹4.87 Billion.
- Built an end-to-end analytical solution to monitor transaction volume, transaction value, tax collection, fees, customer activity, and transaction success rates across multiple customer segments.
- Created interactive visualizations to analyze monthly transaction trends, transaction status distribution, customer segment performance, state-wise transaction activity, and gender-based transaction patterns.
- Implemented advanced DAX measures for transaction analysis, success rate calculation, failure percentage tracking, average transaction value, and business performance monitoring.
- Developed dynamic filtering capabilities using slicers and bookmarks, allowing users to perform ad-hoc analysis across customer segments, regions, and transaction types.
- Delivered actionable insights into customer behavior, regional transaction trends, and banking performance metrics to support data-driven decision-making.

API Performance Monitoring & Analytics System | Python | SQL | MySQL | Power BI | DAX

- Designed and developed an end-to-end API monitoring and analytics platform to analyze 100K+ API transaction logs across multiple services and endpoints.
- Built automated ETL pipelines using Python to extract, clean, validate, and transform raw log data into structured analytical datasets.
- Developed 40+ SQL queries utilizing Joins, CTEs, Aggregations, Window Functions, and Subqueries for KPI reporting and operational analysis.
- Created API performance KPIs including Success Rate, Error Rate, Average Response Time, P95 Latency, P99 Latency, SLA Breach Rate, and API Health Score.
- Built an interactive Power BI dashboard enabling real-time monitoring of API availability, failures, latency trends, and endpoint performance Automated reporting workflows to improve monitoring efficiency and operational visibility.
- Conducted root-cause analysis on high-failure endpoints and identified performance bottlenecks impacting service reliability.

Business Performance & Customer Intelligence Dashboard | Power BI | SQL | Excel | DAX

- Developed a comprehensive 5-page business intelligence dashboard analyzing \$2.3M in sales revenue, \$286K profit, and 9,994 customer orders
- Built an optimized star-schema data model consisting of Fact Sales, Customer, Product, Region, and Date dimension tables
- Implemented advanced DAX calculations including MTD, QTD, YTD, Running Totals, Variance Analysis, Growth %, & SAMEPERIODLASTYEAR comparisons.
- Performed customer segmentation analysis to identify high-value customers and purchasing behavior patterns.
- Developed cohort and retention analysis reports to evaluate customer loyalty and repeat purchase trends
- Created drill-through reports enabling detailed analysis of regional performance, product categories, and customer segments.
- Automated dashboard refresh and reporting processes, improving decision-making speed and reducing manual reporting effort

CERTIFICATIONS

- Data Science Certification – Besant Technologies
- Extract, Transform and Load Data in Power BI – Microsoft
- Harnessing the Power of Data with Power BI – Microsoft
- Preparing Data for Analysis with Microsoft Excel – Microsoft
- GenAI for Data Analytics – WsCube Tech

EDUCATION

B.E. Computer Science and Engineering

Hindusthan Institute of Technology, Coimbatore | CGPA: 7.2

2022- 2026
